Durum Wheat

SY Nilo

Key strengths

Excellent response to agronomic inputs

High and stable yield potential in any environment

Good disease tolerance

EARLY cycle

high productivity

Sowing recommendations

Seeding rate: 218-247 kg/ha

Seeding density:
(germinable seeds/m^2) 370-420

Notes:
Late sowing possible,
prefers well prepared soils

Sowing area
Central-south Italy

CHARACTERISTICS

Morpho-Physiological Traits

Size	medium
Lodging resistance	medium
Awn color	light

Resistance to Biotic and Abiotic stress

Powdery mildew	medium tolerance
Brown rust	medium susceptibility
Septoria	susceptible
Head blight Fusarium	susceptible

Qualitative Traits

Thousand Grain Weight (TGW)	excellent
Hectolitre weight	good
Vitreousness	low
Protein content (%)	low > 11%
Gluten index	good
Semolina color intensity	medium
