Bread Wheat

KWS Criterium

Key strengths

Excellent adaptability to all environments

Very productive as FF

Suitable for intensification

MEDIUM cycle

FF Strong Wheat

Sowing recommendations

Seeding rate: 201-225 kg/ha

Seeding density:
(germinable seeds/m^2) 420-470

Notes:
Suitable for all growing conditions, moderately sensitive to Chlortoluron

CHARACTERISTICS

Morpho-Physiological Traits

Size	small
Lodging resistance	excellent
Alternative habit	winter
Ear type	with awns

Resistance to Biotic and Abiotic stress

Powdery mildew	medium tolerance
Brown rust	medium susceptibility
Septoria	medium tolerance
Fusarium head blight	medium tolerance

Qualitative Traits

Thousand Grain Weight (TGW)	medium
Hectolitre weight	good
Hardness	medium/hard
Protein content (%)	good >13%
Grain colour	red
W	> 300
P/L	0,4-0,6
