Bread Wheat

KWS Milanum

New

LATE cycle

FP Bread-making Wheat

Key strengths

Balanced alveographic profile

Excellent resistance to disease

Exceptional performance in every situation

Sowing recommendations

Seeding rate: 194-220 kg/ha

Seeding density: (germinable seeds/m^2) 380-430

Notes:
Suitable for all growing conditions, sensitive to Chlortoluron

CHARACTERISTICS

Morpho-Physiological Traits

Size	medium
Lodging resistance	medium
Alternative habit	winter
Ear type	with awns

Resistance to Biotic and Abiotic stress

Powdery mildew	medium tolerance
Brown rust	medium tolerance
Septoria	medium tolerance
Fusarium head blight	medium tolerance

Qualitative Traits

Thousand Grain Weight (TGW)	good
Hectolitre weight	medium
Hardness	medium
Protein content (%)	medium >12%
Grain colour	red
W	160-180
P/L	0,5-0,7
