Bread Wheat

KWS Constellum

New

LATE cycle

FF Strong Wheat

Key strengths

Excellent milling quality

Excellent resistance to lodging

Excellent plant health in relation to the reference class

Sowing recommendations

Seeding rate: 191-215 kg/ha

Seeding density:
(germinable seeds/m^2) 400-450

Notes:
Suitable for all growing conditions

CHARACTERISTICS

Morpho-Physiological Traits

Size	medium
Lodging resistance	good
Alternative habit	winter
Ear type	with awns

Resistance to Biotic and Abiotic stress

Powdery mildew	medium tolerance
Brown rust	medium tolerance
Septoria	medium susceptibility
Fusarium head blight	medium tolerance

Qualitative Traits

Thousand Grain Weight (TGW)	medium
Hectolitre weight	medium
Hardness	hard
Protein content (%)	excellent >14%
Grain colour	red
W	> 400
P/L	0,4-0,6
