

# Oat Fulvia

## Strengths

Red oat

For the production  
of grains and fodder

Alternative

## Sowing advice

Sowing density (germinated seeds/m<sup>2</sup>)

	October	November	December	January	February	March
<b>Northern Italy</b>	350-380	350-380	370-400	400-450	450-480	450-480
<b>Central Italy</b>	-	370-400	400-430	420-470	470-500	470-500
<b>Southern Italy</b>	-	350-380	370-400	400-450	450-480	450-480

## FEATURES

### Morpho-physiological characters

Plant height	89-90 cm
Ear	medium
Grain	red
Tillering	high
Habitus	alternative
Earing	early

### Qualitative characters

1.000 seeds weight	32-35 gr
Test weight	48-52
Proteins (%)	14-15%
Content in fats	12%
Yield at decortication	79-80%

### Resistance to biotic and abiotic stress

Cold	medium tolerance
Water stress	tolerant
Lodging	medium tolerance
Oidium	medium tolerance
Rusts	medium tolerance
Septoria	medium tolerance
