

Chick-pea Maragià

Strengths

Beige seed, medium wrinkled, large caliber

Excellent tolerance to *Ascochyta rabiei*

Excellent plant fertility

Sowing advice

Sowing density (germinated seeds/m²)

| | October | November | December | January | February | March |
|----------------|---------|----------|----------|---------|----------|-------|
| Northern Italy | - | - | - | - | 40-45 | 45-50 |
| Central Italy | - | - | - | 40-45 | 40-45 | 45-50 |
| Southern Italy | - | 30-35 | 30-35 | 30-35 | 40-45 | 40-45 |

FEATURES

Morpho-physiological characters

| | |
|--------------|------------------------------------|
| Plant height | 60-65 cm |
| Seed | beige/medium wrinled/large caliber |
| Flower | white |
| Plant type | erect |
| Habitus | alternative |
| Cycle | medium-early |

Resistance to biotic and abiotic stress

| | |
|--------------|----------------------|
| Cold | good resistance |
| Water stress | good resistance |
| Lodging | excellent resistance |
| Dehiscence | excellent resistance |
| Ascochyta | excellent resistance |

Qualitative characters

| | |
|--------------------|------------|
| 1.000 seeds weight | 450-550 gr |
| Proteins (%) | 21-23% |
